Wegener	Hank	76	Viper	Mercury	2.4 Bridgeport EFI '99	240	CLE	5"	30" big-ear chopper		CMC hydraulic jackplate; solid mounts; dual steering; foot throttle.	I bought this boat brand new in 1976. I ran the original 115 Merc for over 16 years. Top speed mid 60's w/ 2 GSS. After burning pistons, I went for a new 4 cyl. 235 Merc...good pulling power, but dismal 60 mph top speed. I have tried 4 motors since, even a 175 EFI Merc. Impressive hydrofoil.

Oltzig	Brian	83	V-King	Mariner	V6	175	CLE	2"	26" Yamaha		Jackplate	I am the third owner, having purchased this rig from my brother. After 10 years of continuous use, I am currently in the process of a complete restoration of the hull. The floor was getting a little weak and the gel-coat was badly faded, so I opted to take it all the way down and give it a total make-over. It's ready now for the new 3-color custom. Updates include a glassed-in plate for the foot throttle, new gauge package mounted in custom laser-engraved dash panel, and a hydraulic jack plate. A GREAT ski boat with just enough to "play" with the locals!

As the local Johnson and then new Hydro-Stream Dealer in Brunswick, this special ordered Red w/Metal Color graphics HST, Black GT-200, and Custom-Matched Tandem Trailer made a dramatic impact in appearance, sound, and just raw speed! I always have her displayed on the show-room floor when not being raced and shown. This combo sure boosted the Johnson motor sales back then. During the winter of 1988 and after numerous props, boat set-ups, and engine mods, I got her to run-out at 103+ without NOS. She was clearly the class act at the "1988 Spring Blessing of the Shrimp Fleet" festivities at both the Brunswick and Darien, GA events. She was the local Top-Gun until spring of 1989 when the upset Mercury guys finally brought in a bigger gun from out of town and spanked me. It was all a lot of fun back then!

The motors, transom, lower unit etc.. have always been stock. With the 200, Clocked on Radar 78, with the 225, GPS @ 81, 90 would be nice, but it works for me! By far the best handling rough water boat I have ever been in! I would not suggest the OPTI, the fuel economy is amazing but it is a very quirky motor that can be run no higher than 6000 RPM's, it's also very, very, heavy. I'd like to put a 225 PRO-MAX on it some day.

Schock	Jay	76	Viper	Mercury		115	Stock					I purchase this boat 2 years ago from a family friend. Since then I have restored the interior. I rebuilt and recovered the original seats. I stripped the boat down and repainted it black and gave it a candy apple red flame job. I also replaced the broken windshield and installed a vinyl cutout. The original straight 6 115 merc runs perfectly. Next on the agenda is a jack plate, low water pickup and a hotfoot to see if I can get some more performance out of it. As it sits the speedo shows around 62, but I have not had a chance to get a radar or GPS reading.

I custom built this boat myself. I found the hull in Cali for $240. It had never been wet and a was company used it to test their products on. I then contacted John @ HydroStream and had him lay up a deck for me. I sand and picked it up and finished the boat in my garage with the help of my father. We balsa cored and vacuum bagged it, etc. Current best speed is 60mph, and we haven't found the perfect prop yet.

Jacques	Charles Jr.	87	Vegas XT	Mercury '93	Mod.	200			28" Hoss Triton 29" Marzo		Detailer jackplate.	We ordered this boat from Hydrostream back in 1987. If my memory serves, we ordered the color scheme to match the stripes on the cowling of our 2.6L 8P Offshore which we ordered a year before we got the Vegas. Sold the boat in 1988.....and bought it back from the same individual who we sold it to.....only 1½ years later!!! We've updated the boat by removing all the wood from inside the boat and replaced it with Kleguard. Added some kleguard knees in the back running from the transom through the floor and to the bottom. When we got all the floor taken out of the boat, my Dad and I remembered that we ordered this boat a light lay-up.....Well now its really light!!! Sea-7400 - 7500 rpms with a 28 Hoss Triton and 7400 with a 29 Marzo.

Plan on dealing the bottom and deck this winter. The boat is rigged with dual Ride glide,hot foot and CNC hyd. jack plate. I run a small eared merc 28pitch chopper. I have tried a Ron Hill 28pitch Yamaha copy,but found the chopper gets the hull on the pad better. Ben running the prop shaft center line 3/4 of an inch below the pad with the jack full up,plan on chasing it to 3/4 of above the pad after the bottom is done. The engine is pretty much a stock OMC 3ltrxrq5 (2.6L) x-flow with the following add ons, Land and sea LWP cone,solid mounts,V-stacks, Bobs cavition plate and Holley blue fuel pump. With myself 230lbs,my wife 127lbs,full load of fuel 15gals,dog 100lbs Pom and all the needed DNR required equipment plus a cooler on board this setup will turn the chopper a wide open throttle at 6600 rpm. With the yamee copy the hull planes faster but the hull seems to not get on the pad, and with the

I will soon be changing my motor to a Mariner supermag 225hp. Before i do I have decided to go through the boat, new seats, make minor repairs, and strengthen the transom. I am looking for any technical and construction information / literature / illustrations I can get.
